Simply upload the GPX file to your unit and start hunting for caches. Show off photos of your excursions with Oregon's picture viewer. Keep Your Fix

With its high-sensitivity, WAAS-enabled GPS receiver and HotFix™ satellite prediction, Oregon 200 locates your position quickly and precisely and maintains its GPS location even in heavy cover and deep canyons. The advantage is clear — whether you're in deep woods or just near tall buildings and trees, you can count on Oregon to help you find your way when you need it the most.

Add Maps

Conveniently plug in optional preloaded microSD cards for all your outdoor activities on land or water (see maps tab for compatible maps). Just insert a MapSource® card with detailed street maps, and Oregon provides turn-by-turn directions to your destination. Add select topographic maps to take advantage of Oregon's 3-D map view which gives you a better perspective of your elevation. With BlueChart® g2, you'll get everything you need for a great day on the water including depth contours, nav aids and harbors. The card slot is located inside the waterproof battery compartment, so you don't have to worry about getting it wet.
