

Nova Jack ATV Logging Equipment

Equipment especially designed to haul wood with your ATV

Novajack products and accessories are designed for use by one person working solo – meeting the specific needs of private woodlot owners. Rugged and easy to use, they make your work safer and more efficient.

From logging trailers to arches to gas winches and skidding cones, Novajack's innovations cover the gamut of tools and accessories now indispensable to logging work. If there is something you need that you do not see in this catalog give us a call at 1-800-561-3600 and we will do our best to get it for you at the best possible price.

BAP Equipment Ltd.

1-800-561-3600

1.

Skidding Cone

The NovaJack skidding cone will prevent logs from being stopped by roots, stumps or residual trees. It also protects your valuable trees along the path from being damaged.

Operator safety is enhanced, as the cone prevents sudden stops caused by logs getting caught in an obstacle. Made of high-performance polymer plastic, the skidding cone is strong, yet flexible. It's 20" opening lets you haul large logs or bunches of smaller logs.

Use the skidding cone to skid logs directly behind your ATV with the pulling plate, or bring logs to the trail using a corner block and Kevlar™ rope. It also works very well with the Capstan Winch. Use it year round, down to temperatures of -30°C (-22°F).

Material : Polymer
Weight : 10 lb (5 kg)
Opening size : 20" (51 cm)
Height : 26.5" (67 cm)

Call 1-800-561-3600

Corner Block

CALL 1-800-561-3600

The corner block lets you change the line pull direction of a log to avoid obstacles or to position it parallel to the trail. This allows you to keep your ATV on the trail, using it as a winch for extracting logs from the woods. With the automatic release in place, the rope will come off the pulley at the appropriate point, allowing the log to turn the corner and come to rest alongside to the trail. The corner block is also very useful with the Capstan Winch get some lift on the rope or to double your line (and power).

PCA -1270 Corner Block - \$59.95

Automatic Release

An ingenious device for releasing the rope from the pulley to allow a log to 'turn' into the trail. Depending on the distance the anchor tree is from the trail, you may adjust the automatic release to make the rope slip out of the pulley at the appropriate moment. Simply turn the chain link one-half turn around the rope and insert it into the metal cartridge. Will not damage synthetic ropes.

PCA - 1291 Automatic Release - \$24.95

Polyester Sling

Fasten a Capstan Winch or corner block to a tree, without damaging the bark or cambium of anchor trees. Polyester sling will not stretch. Very useful for lifting or used as a choker. Capacity is 6000 lb (2728 kg) when used basket style (i.e. when anchoring the winch), or 3000 lb (1364 kg) in choker style (i.e. when anchoring the corner block).

PCA - 1260 Polyester Sling - \$21.50

Pulling Plate

CALL 1-800-561-3600

Makes it easy to attach a Kevlar™ or polyester rope or a chain-choker to an ATV. Fits over 1 7/8" or 2" (4.77 cm to 5.09 cm) ball hitch. Slide the pulling plate over your ball hitch, and fasten your load to it quickly and securely. Attach your rope to the 2" (50 mm) post using the clove hitch, or insert a link of chain into the slotted plate to pull your load. Pulling from the axle level provides the safest pulling point on your ATV

PCA -1310 Pulling Plate -\$59.00

Storage Reel

Makes ATV transport and storage of polyester or Kevlar™ cables easy. Installs on all types of ATV luggage racks. Lets you wind and unwind rope easily and quickly, without tangling. Holds up to 150' (45.75 m) of 3/8" (9.5 mm) rope.

PCA - 1250 Storage Reel -\$55.00

Polyester Rope 3/8" x 100'

With a breakpoint of 4400 lb or 7200 lbs, this rope is available in lengths of 100' (30.5 m) or more. Although not as strong as our Kevlar™ rope, it has the same double braid construction for durability and low-stretch properties for safety. Not recommended for using while pulling with the ATV because of its lower resistance to shockloading than Kevlar™ rope.

PCA - 1201 (3/8" x 100' Polyester Rope -4400 lb) - \$59.00

PCA - 1211 (1/2" x 100' Polyester Rope -7200 lb) - \$85.00

Prices subject to change without notice

3.

Grab Hook

A 5/16" (7 mm) opening will grab either 5/16" (7 mm) or 1/4" (6 mm) chain. Equipped with a 1/2" (12 mm) diameter grommet, it can be attached to any 1/2" (12 mm) rope or smaller. Attach the hook to the polyester or Kevlar™ cable using the bowline knot. The bowline knot provides a secure connection, and can be untied if required

PCA - 1280 Grab Hook 5/16"(7mm) - \$3.95

PCA - 1275 Grab Hook 5/16"(7mm) with latch - \$12.95

Choker Chain

Equipped with a C-hook; for use with a skidding cone, Capstan Winch or logging arch.

Made of 1/4", grade 70 steel, the chain-choker is equipped with a special C-hook for quick, secure installation and removal. Also comes with a 12" long 'needle' that lets you slide it easily under logs as well as through the skidding cone for pulling through. Available in 7'

PCA - 1295 Choker Chain (1/4" x 7') - \$34.95

C-hook

C-hook for quick, secure chain installation and removal. Convert an existing chain to an efficient chain-choker. For quick, secure installation and removal. Installs on 5/16" (7 mm) or 1/4" (6 mm) chain.

PCA - 1299 C- Hook -\$14.95

Safety Hook

An all-purpose hook with latch. May be used to anchor the Capstan Winch or V-chain, among other uses.

PCA - 1281 Safety Hook - \$7.95

Prices subject to change without notice

CALL 1-800-561-3600

ATV Continuous Traction Chains

Increase your ATV's traction and braking ability.

Diamond pattern chains (similar to skidder chains) provide continuous contact on the ground for smooth riding and continuous grip. Traction is greatly increased, so you can pull heavier loads while making easier for your ATV – no more tire spinning. Better traction also means increased safety : your ATV will be more stable on downhills while pulling a loaded trailer, preventing the jackknife effect.

Contrary to snow chains, continuous traction chains will never slip or twist, and are made of high quality steel case hardened to 63Rc. These chains will not wear out, and will protect your tires from wear. They can be kept on year round, as they are effective in mud, snow and soft ground conditions.

We recommend installing continuous traction chains on rear wheels only.

NS-702610 – tire sizes 24 x 9 x 11 up to 26 x 10 x 12 - \$Call For Pricing

NS-702615 – tire sizes 25 x 12 x 9 up to 27 x 12 x 12 - \$ Call For Pricing

Weight : 35 lb (16 kg) per pair

Call 1-800-561-3600

Capstan Winch

If you ever need to bring down hung-up trees, pull out-of-reach logs, get a vehicle un-stuck, or haul a moose out of the water, the Capstan Winch is for you. Weighing only 17 lb (7.7 kg), the Capstan Winch is easily carried and is anchored to any tree or stump using the 2" (50 mm) wide, 6' (1.8 m) long sling provided.

Use the Capstan Winch with any length of low stretch rope. We offer double-braided polyester rope in lengths of 100' (30 m), 150' (46 m), 300' (91 m) and 600' (183 m). The rope is tied to the object to be moved and wound three times around the capstan drum. When the engine is running, the capstan rotates continuously and the friction created by pulling on the free end of the rope makes the object move. Load will move at a speed from 22 to 34 feet/minute (7 to 10 meters/minute), depending on the weight of the load.

The 2000 lb (900 kg) pulling capacity of the Capstan Winch compares with the biggest ATV electric winches but offer many advantages :

- portability (anchors to any tree or stump)
- 100% duty cycle (vs. 20% duty cycle for electric winches)
- constant pulling power (standard winches are rated for 1st layer pull)
- unlimited rope length
- no kinks, pig tails or barbs on rope

Engine : Tecumseh 2-stroke, 50cc
Line speed : 22-34 ft/min (7-10 m/min)
Line pull : 2000 lb (907 kg)
Weight : 17 lb (7.7 kg)

Call 1-800-561-3600

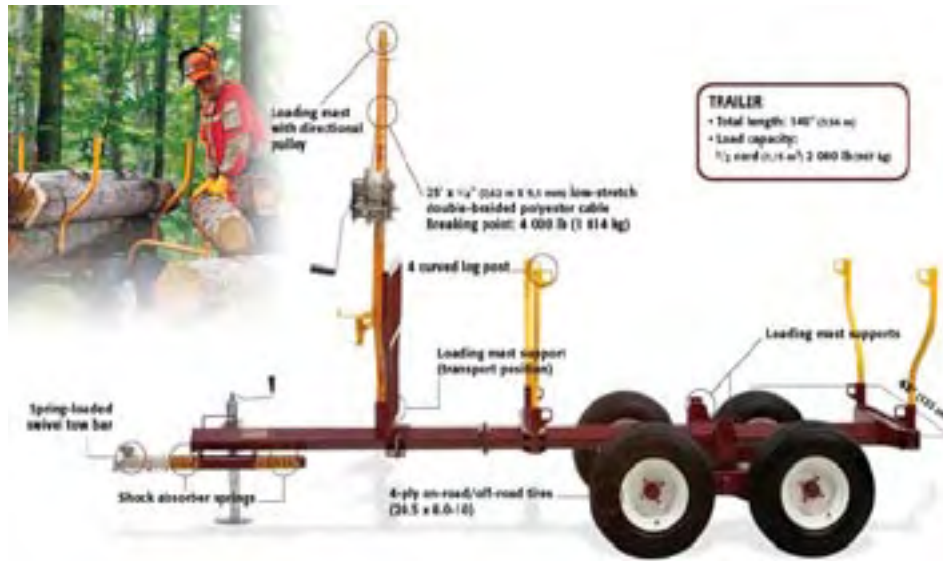

PCW - 5000 Portable Winch - \$1395.00

5. Forestry Trailer Kit

Using NovaJack tools with your ATV allows you to perform Timber Stand Improvement work efficiently, with minimal impact on soils and trees. All NovaJack tools have been designed to maximize output, to reduce physical effort and to protect soils and trees. They are known for their ruggedness, their reliability and their ease of use.

Designed for forwarding logs of various lengths. Loading mast with 2300 lb (1043 kg) hand winch will load logs up to 24" (61 cm) diameter into trailer. Loading pivot will help you load smaller logs efficiently with minimal effort

Call For Pricing 1-800-561-3600

Logging arch

Skid large logs quickly and easily!

The ingenious pivoting arch will lift logs up to 24" (60 cm) diameter off the ground effortlessly as your ATV moves forward. With the front-end of the log raised, you can pull large logs (or a bunch of smaller ones) over rough terrain. The log being suspended on the choker-chain, the load shifts from side to side, making it easier for the wheels to go over obstacles. Although the logging arch can haul tree lengths, we find that logs from 16' (5 m) to 25' (8 m) are easier for turning and maneuvering through the woods.

There is also less friction on the ground from a shorter log (less flex), which means you can pull bigger loads.

The logging arch is ideal for hauling log on short and medium distances and for moving logs around the yard.
