

Specialized Technical Footwear Forestry Industry

Royer

For the forestry workers and tree pruners, the risk of contact with a chainsaw in operation is a very real danger. We have developed a range of boots, adapted to the special rigors of this work environment. Moreover, our new forest orange nylon boot (F1) meets the new CSA standards for improved protection against the danger of injuries caused by accidental cut of a chainsaw.

- Protection against cuts meets CSA Standard Z-195-02 (F1)
- Waterproof microporous membrane (WMVP)
- Abrasion resistant external nylon
- Combining the comfort and support of leather boots with the waterproof features of rubber boots
- Sizes 4 to 12 + ½, 13, 14, EEE width for men

Royer Lumberjack 8614 Boot.

Style with steel plate and grade 1 steel toe.

Chainsaw protective footwear.

Steel toe.

Stainless steel plate.

Width: EEE.

Sole: TRACK.
